Yarachand Thawards & Ca. A NOTIFICATION is to be iggued shortly says the Bangkok Times, that an export duty of two ticals on each bullock, and The M. M. Co.'s steamer Yarra, with the three ticals for each buffelo, is to be charged by the Customs Department, As some three thousand bullocks are shipped at 8 p.m., and may be expected here every month, on an average, the imposi should be profitable.

THE raison a fore of the mosquite, bays the Queenslander, has remained among the arcana of the universe putil last week. There were some who tried to explain the fact of its existence on the general theory that our present stage is one of discipline, and that the mosquito was a factor in the disciplinal system, which is absard. The object of discipline is to make people morally better. The good of the mosquite simply drives men to perdition. There are others who state that the mosquito-poison is a preventive of malaria. That would be all right if the mosquite would only restrict its operations to malarial districts and possible malarial cases, but the everlating medium is worse than the occasional expected here on or about the 26th disease. But an incident that has just occurred in South Australia furnishes the real solution of the mystery. An old laily living in Kent Town noticed something moving in the milk she had just obtained from her milkman, and closer examination proved that it was a mosquito in that stage when the insects live in water. There's the secret. When Nature first made milk. she at the same time foresaw the milkman and his wiles. Simultaneously also she foresaw the scaroity of artificial milk. testers, and proceeded at once to create a natural milk tester which should be at once The P. & O. s. s. Malacca left Lundon for cheap and handy. The result was the mosquito, which at a certain stage will be found in water and not im pure milk. In the case of the lady in Kent Town, the milk containing the mosquito-index turned ont upon scientific analysis to contain 76 per cent of water. And but for that feetal mosquito she would have paid for that liquid as milk | Depend upon it, Nature does nothing in vain and when next you are on the yerge of uttering Satanic shipboleths through the workings of mosquito poison, try to remember that the issue of your torturer may serve to secure pure milk to some good old lady in Kent Town

or elsewhore. FRAGRANT WATERS MURMUR That at the last Council meeting the isecond officer in command in the Council having taken his seat, was duly sworn, and then welcomed, first by the Governor and next by Mr Chater. That whether usual or not, the procedure was not without its significance, in its bearing upon what Mr Bonser would call the advantages of being governed under

the wide and statesman-like views, of the Secretary of State. That Mr O'Brien's reply to this rather out-of-the way reception struck me sa the neatest of the three speechlets. That I have no doubt the Council -and the

community too will generously make allowance for Mr O'Brien's inexperience until he has had some little time to acquaint himself more fully with the conditions and circumstances of the colony.

That although the new Colonial Secretary modestly hints that the fault lies in himself, that he is unacquainte ed with the conditions and circumstances of the Colony, most thinking men will readily conclude that it is the system, and not the man, to which objection can be taken

That the fact is, the Crown Colonies are growing out of their awaddling clothes. and the system of government from the Colonial Office is getting rather wastitshie and unacceptable in many particulars; but official spectacles have not yet been brought to the discerning point. That it is to be hoped the more advanced section of our statesmen will come to see this element of unfitness in time to evold opnecessary inclini. That I do not say so ou account of what

lence, because that form of officialism is fortunately rare, and may be explained away by a physical bilious condition begotten in the Straits that the legal adviser of the Crown should so exceed and misconstrue his instructions as to attack the representatives of the Colony like a man demented, so as to call down upon his head the censure of the Queen's Representative, is a spectacle not usually witnessed seen in a

Crown Colony.

-you term the Bauserian style of inso-

but the anapping of this ill-conditioned official should bave been indulged in when the good people of Singapore were bending under the full weight of the alltoo-heavy military exaction, shows that Mr Bonser knew not his surroundings, his clients, nor his opponents. That anyund reading the Woods in the Singapore Council can see that this unwice Attorney General overleaped the mark and fell prope on the other, side; but it is annoying to find such bungling set down as peing in the

After this I never looked behind me.' This is a very common expression. What do U 1892, at 3 p.m., the Company's people mean by it? Lot's wife looked behind 8.8. SACHSEN, Captain H. Look behind us or Parcels until 10 a.m. on the 2nd April.

We introduce a man who says he never looked behind bim-after a certain time. How are we to take his meaning? Why, by letting him

He goes on to may that in one day in Pebruary, 1830, he was anddenly seized with disziness and pain in his head. Like all healthy people, under similar circumstances, he didn't know what to make of it. He says be felt strange and queer, he shivered as though the weather had suddenly turned cold, and then flushed with the heat as though it had turned hot again. What ailed him ?-His doctor said he was attacked with influenza and ordered him to bed. He went to bed. low days later the fover left him, but the liness did not. It merely assumed another form. His tongue looked like a piece of brown leather, and his skin and the whites of his eyes became yellow, like old parchment. We must all cat to STATES, MEXICO, CENTRAL AND Itre, but when this man tried to eat, the food SOUTH AMERICA, AND EUROPE, went against him, and after he had awallowed it by main force, it caused such pain in the chest, side, and stomach that he wished he had let it sions. Then his heart began to palpitate, and he says he feltlow, languid, and tired. He had what he calls a sinking feeling at the pit of the stomach and a craving which nothing satisfied.

Being unable to take any but liquid food he grew so weak that he was barely able to walk, Then his heart troubled him once more, and, to

quote his own words, " As I sat in my chair I could hear my heart thumping as if somebody was pounding me on the back. This showed that the beart had too much work on hand and was struggling under it like horse trying to carry two men. 'I got very little sleep at night,' he says, 'and would lie sort of thing is very wearing, and we are not Japan Ports. surprised to learn that he lost flesh until little was left of him but skin and bone. My cheeks, he says, sank in until they were almost drawn together, and people shook their heads and predicted that my time in this world was nearly up. Still I had all confidence in my physician and kept on taking his medicine From first to last I took some forty or fifty bottles of it (of all kinds) without benefit. Finally one day the the doctor sounded my lungs and asked me if any of our family died o consumption. He said that the heart polpitation was caused by dyspersia. Then he said I had better take further advice; he could do no mor for me. This was after nine months of his

treatment. I gave up all hopes of getting better, and, indeed, no one expected me to. It was now winter again, December, 1890. One day I found a little book or namphiet in the house, that I liad never seen before. It was about a medicine called Mother Seigel's Syrap, and described a case like mine having been and fears on the point, it is enough to say that I got a bottle from Mr Kirkman, Chemist, Ellerby Lane. I took the contents of that bottle and certainly felt a little better. I took a second and began to eat solid food, which sgreed with

After this I never looked behind me, though my recovery was a work of time, for I was very much reduced. "I wish others to know what Seigel's Syrup has done for me, and I give the proprietors permission to publish this brief account of my case. I am a cloth presser by trade and have worked at Mozers Hepworth & Sons, Glay Pit Lane, for four years. - HARVEY ASKEW, 2, Back Timber Place, Ellerby Lane, Leeds.

The doctor was right in saying that the apparont heart trouble in Mr Askew's case arose from dyspepsia, for dyspepsia was his only allment. And if he had used Mother Seigel's Syrap in February, 1890, he would have had no tale to tell, for he would have been all right directly As it is we are glad that after he did try it he had no relapse. He never looked behind him.
